MATERIALS MANAGER

TDM & Associates is an award winning executive and professional search firm with offices in Illinois and Arkansas.

Our client, a high growth privately held company located in Central Illinois, is looking for a dynamic individual to manage the production scheduling, warehousing, shipping and receiving and inventory control functions ensuring customer service targets are met.

The Materials Manager will play an integral role in the implementation of a new ERP system and will contribute to the lean manufacturing and best practice initiatives being undertaken by the company. A heavy emphasis on process improvement, procedure, and training and development will be needed.

Additional Qualifications include:

- BS degree in Business or related field.
- 10-15 years of experience in production planning and inventory management.
- Leadership skills along with the ability to influence change.
- Understanding of production and distribution costs structure.
- Excellent analytical skills and computer knowledge (SAP, Oracle or other major ERP platform)
- APICS certification a plus.

Interested candidates should submit their resume to:
