

“Continuous Improvement Trio: Theory of Constraints, LEAN, and Six Sigma Make Beautiful Music Together”

Join us for this exciting 8-hour interactive seminar and exercises.

- Do you need to improve your production planning and control, scheduling, and materials management?
- Would synchronizing your sales, production, engineering, and finance functions make your company more productive?
- Are you using LEAN and Six Sigma, but not seeing results?

What will you gain by attending the seminar?

- Learn to map a Value Stream step-by-step from current state to future state.
- Discuss the PDCA and DMAIC (Six Sigma) frameworks along with kaizen, root cause problem solving, and the sustainability of improvements.
- Identify and evaluate steps and techniques that may specifically help your Company.

The seminar hits the mark, and includes continental breakfast at 7:30 am, lunch and a workbook with copies of the presentation. “Lessons Learned” will be shared among participants.

Presented by Jeff Rideout, Founder and President Odyssey Solution Group, and Craig Simpkins, CFPIM. Jeff has successfully taught and implemented the Theory of Constraints (TOC) approach to Lean Manufacturing in more than 30 organizations across a variety of manufacturing industries. He is a protégée of management guru Dr Eli Goldratt, the creator of TOC. Craig is a Certified Fellow of APICS and has led APICS training sessions for several years as well as taught LEAN Accounting Principles to progressive manufacturers. Craig's financial expertise brings a unique perspective to LEAN. Go to www.rakeapics.org for more details.
